EDUCATION

University College London – London *Sep 2024 – Jun 2027*
BSc Information Management for Business **Grade: First Class (74.17% average)**
- Modules: Software Engineering, Database Systems, Business Analytics, Technology and Digital Strategy

The Koc School – Istanbul *Sep 2022 – Jun 2024*
International Baccalaureate Diploma
- IB Diploma: 41/45, equivalent to A*A*A* at A-Level

PROFESSIONAL EXPERIENCE

Monk AI Group – London *May 2025 – Present*
Product Manager
- Led product discovery for 12 enterprise AI engagements across insurance, industrial, property and professional services clients in the UK, US, South Africa and Turkey, covering 41 departments
- Coached 50+ consultants through 230+ sessions and designed the Solution Architecture curriculum used to train them
- Architected 10+ automation solutions per engagement and ranked them by volume, frequency and breadth; 7 engagements reached funded implementation
- Ran hypothesis-led discovery on every engagement, testing each solution against interview and process evidence and repositioning rejected prototypes around client objections
- Wrote 5 build-ready spec packs with acceptance criteria, scoping 7 modules into two parallel 90-day milestones
- Created and presented live prototypes to client leadership at the end of each audit, converting their feedback into revised scopes, ready for production
- Built ROI and business-case models projecting an average of up to 1.94x annual return, underpinning client investment decisions that contributed to $400K in closed engagements
- Built agentic AI pipelines in Claude Code that cut discovery analysis from 15+ to 5 hours per engagement

EY – London *Jul 2026*
Audit Intern
- Prepared the internal AI adoption pitch for UK&I Assurance partners and a tender presentation for a shipping audit mandate
- Tied out half-year statements, prepared the going concern review and restructured 61 sets of board minutes with AI-assisted review

Kokteyl IT Services – Istanbul *May 2025 – Jun 2025*
Software Engineering Intern
- Built the first volleyball data pipeline in C# and SQL for Ofsayt, a sports app with 750K+ downloads, and replaced a profanity filter based on a 128K word list with a locally trained model

PROJECTS (ANONYMISED CLIENT PROTOTYPES)

AP Automation Demo Suite – Property management client *Claude Code, Next.js, TypeScript*
- Ran discovery with 2 accounts payable teams and built an 8-module, 30-screen prototype covering invoice intake, utility bill reconciliation and vendor sync, with numbered acceptance checks per module
- Directed parallel Claude Code agents to build modules simultaneously, and deployed a live public version

FlexOps AI – Flex industrial real estate operator *Claude API, Next.js, SQLite*
- Took 5 AI prototypes from discovery to a deployable build, including lease abstraction and cited rent comps from broker memoranda; cut 2 planned demos on client feedback

Cedar Peak Automation Suite – Manufactured housing community operator *Claude Code, Next.js*
- Built the field validation and sales pipeline modules of a 7-solution, 31-screen finance and operations prototype in 4 days, and ran the audit behind it; the pipeline module became the first milestone of a signed six-figure product build

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

UCL Entrepreneurs Society – London *Oct 2024 – Present*
Vice-President
- Directed a 20+ member executive team at the UK's largest student entrepreneurship society, running the speaker programme and establishing joint events with the LSE, King's and Imperial entrepreneurship societies
- Placed Top 5 of 23 teams in the EY x JPMorgan case study competition (UCL Entrepreneurs Business Game)

TeamForge, UCL Software Engineering Group Project – London *Jan 2026 – Apr 2026*
Technical Lead, 4-person team
- Led the team from problem statement and product vision to a MoSCoW-prioritised backlog of 6 epics
- Built the live MVP in Lovable, Supabase and Claude Code. Received a grade of 81.25% for the project

SKILLS & INTERESTS

Skills: SQL, Python (pandas, NumPy; DataCamp track in progress), Claude Code, n8n, Lovable, Excel, Tableau
Languages: English (Fluent), Turkish (Native)
Interests: Technology, Rowing, Home Automations
